Windy Boats AS pursues a policy of continuous product innovation and enhancement. Everything presented in this brochure is subject to change without prior notice. This brochure must therefore be taken only as non-binding guidelines from Windy Boats AS ... The images shown in this brochure do not necessarily show standard boats and cannot therefore be used as references for the standard specification for each individual model ... All boats manufactured by Windy Boats AS are approved for specific categories by RINA and are CE-labelled ... Every attempt is made to ensure that all information in this brochure is as accurate as possible, but it is important to note that a boat's performance and test data are given only as guidance. Fouling of the hull and stern gear, by for example marine growth and mud, propeller damage, engine set-up, engine manufacture and type, air and water temperatures, the weight of fuel, water, stowage and the number of persons on board may all affect the boats' performance and test data. For these and other reasons, Windy Boats is unable to provide any guarantee of test data and boat performance ... This brochure was produced by Innoventi AS, Arendal, autumn 2007, Graphic designer: Jan Petter Lehne ... Printed by Rohland & more Mediengesellschaft mbH ... Exterior and interior photos: Jan Petter Lehne, Stylist: Sidsel Pettersen, 3D illustrations: www.wide3d.no ... TwoBiz and Sail Racing provided marine clothing for the photoshoots featured in this brochure, Interior styling products: supplied by Jernia Paulus Møller, Møbel & Lysgalleriet and Le Creuset Scandinavia - we are very grateful for their assistance ... Design Unlimited Ltd. UK, interior design consultants, 58 Zephyros ... Steimler Interior AS, interior design consultants, 44 Chinook & 48 Triton ... Windy Boats AS undergoes a continuous process of renewal, development and amendments to standard specifications of its products. Specifications presented in this document may be changed without prior notice.

All our models are CE-labelled. This means that Windy meets all the requirements laid down for quality control, documentation and product liability within the EU. In the process of obtaining approval, the company has also introduced new methodologies, construction principles and more advanced production equipment, resulting in more cost-effective and quality-oriented processes in-house. But above all, Windy is a "boat-builder" and not a "manufacturer" of boats, a philosophy which characterises our production staff, our service staff and all those in our distribution network.

All our boats are certified by RINA (Registro Italiano Navale), the market-leader in leisure craft quality approval.

Windy boats combine traditional craftsmanship with modern technology to produce an exceptional product. Utilising the latest innovation of Vacuum Injection Moulding, precise quantities of fluid in a closed process considerably reduces emissions compared with traditional moulding methods. Vacuum injection moulding, in combination with the WinTec concept, gives our hulls improved performance, greater strength and reduced noise. It also allows a significant reduction in the boat's weight whilst offering noticeably improved stability.

All our boats are certified by RINA (Registro Italiano Navale), the market-leader in leisure craft quality approval.

Windy Boats AS undergoes a continuous process of renewal, development and amendments to standard specifications of its products. Specifications presented in this document may be changed without prior notice.

All our models are CE-labelled. This means that Windy meets all the requirements laid down for quality control, documentation and product liability within the EU. In the process of obtaining approval, the company has also introduced new methodologies, construction principles and more advanced production equipment, resulting in more cost-effective and quality-oriented processes in-house. But above all, Windy is a "boat-builder" and not a "manufacturer" of boats, a philosophy which characterises our production staff, our service staff and all those in our distribution network.

Windy is the product of traditional craftsmanship, enhanced with the aid of modern technology. The latest technological innovation is the WinTec concept, which gives the hull improved performance, greater strength and reduced noise. The hull is reinforced with advanced multiaxial glass fibre matting and Divinycell®. This allows a reduction in the boat's weight of up to 20%, while offering noticeably improved stability. WinTec is a standard feature of our latest models.
